

Create your own web site in 3 easy steps:

Select your template on the DESIGN page. From this same page you should select your color scheme, banner, logo and menu style. Also edit your site title, subtitle and footer phrase at the bottom right of this page.

HINT: We recommend you start with a 1 -4 page web site and add pages over time. A typical web site starts with HOME, ABOUT US and CONTACT US. HOME is the first page displayed. You can name them anything you like, and add as many pages as you will need.

Next, name each of the PAGES on your site. Click on the recommended pagesets (left column) for general suggestions. You can add or delete the pages that will appear on your site. Add or remove pages by checking the box and using the appropriate arrow < or >. You can also rename your pages by clicking on the page name.

USEFUL LINKS:

Cancellations can be made at any time. Simply contact us to terminate your account. NOTE: Terminated accounts are erased with no backup.

UPGRADES can be made at any time to one of our other web site products. Contact us to discuss your plans!

ACCEPT CREDIT CARDS on your site. Ask us how!

*“Remember to click on **PUBLISH** to upload your new site, or after making any revisions. It will take only a few moments and your site is **DONE!**”*

Click on NEXT (bottom right corner) which takes you to the EDIT area. Select each of your pages by name at the left, one at a time, and add your copy in the areas indicated. Some text you cannot change here, change the areas you can on each page. After all pages are edited:
